1. Hitori (40 points)

Black out some of the numbers in the grid so that each row and each column contains only different digits. Black squares must not touch horizontally or vertically, and the remaining squares must all be connected to each other.

2. Skyscrapers (40 points)

The grid symbolizes a group of skyscrapers. Each row and column contains skyscrapers of different heights (1-5). The numbers outside the grid indicate how many skyscrapers are visible from that direction (a building located behind a taller one in the same row is completely hidden).

3. Sudoku (40 points)

Fill the grid with numbers from 1 to 9 so that every row, column, and 3x3 block contains different digits.
